

TFS - Herbs Fresh Ginger - Information

Ginger is a knobby, multiple branched rhizome found in many different shapes and sizes. The skin ranges in colour from light to dark tan, depending on the variety, and is semi-rough with occasional callouses and rings ridged along the surface. The thickness of the skin is directly related to whether the rhizome was picked early or mature. Underneath the skin, the flesh is firm, fibrous, and ranges in colour from yellow to brown. The rhizome is also highly fragrant with a warm, woody scent. When fresh, Ginger is juicy and crunchy with a pungent, spicy, and slightly sweet taste.

Ingredients

Ginger

Handling Information

Directions for Use

Wash before use. Ginger can be utilized in both raw and cooked applications and is most often used as a spice or herb in fresh, dried, ground, pickled, or powdered form. When raw, the rhizome can be minced and added to smoothies, shredded and mixed into salads, noodle dishes, or tofu dishes, and blended into dressings and marinades. Ginger can also be used in cooked applications, tossed into soups, curries, roasts, and stews, baked into cookies, bread, and muffins, or used to flavour meats, gravies, and vegetable dishes.

Storage Instructions

Store in a paper or plastic bag in the crisper drawer of the refrigerator.
